ABOUT US (ORIGINAL)

India's Granite is a Bengaluru based firm that was established with an aim to sell natural stones to domestic as well as international markets. The idea emerged from the realization of a huge demand of natural stones in the world. These stones were mainly Indian Granite's, Sandstone's, Slates, Basalt and Lime stones. These stones are mainly used for flooring, wall cladding, outdoor pavings in gardens and other places.

The production line of India's Granite is strategically located in a place in India which has a rich granite belt. Thus the firm has an uninterrupted supply of raw materials and can supply the finished granite products to the clients. Our affiliates are bid winners of regular auctions done by government in Tamil Nadu and Karnataka which covers approximately 300 colors of granite.

Thus, our affiliates are always collaborating with Foreign Quarry owners from Norway, Spain, Italy and Brazil for procurement of blocks for barter substructures. These blocks are then processed in India not only into Polished slabs but also in other various finishes like Flamed, Honed, Leather, Bush hammered and Laparto and re-exported world wide. International inspection agencies like bureau Veritas, SGS, Lloyds are hired to satisfy International clients at all levels of supply.

The company also exports a wide variety of other products ranging from Natural Split Finish Basalt, Slate, Sandstones and lime stones. pioneer in exporting Modular Granite Tiles, Granite Treads, kerbstones & Sets (Cobble Stone).

As an Indian Natural Granite and Natural Stone trader we care for quality of Stone right from the initial stages of block procurement, cutting of material into slabs, polishing, packing/stacking and stuffing in containers. We have the most modern machines of International standards with technologically advanced processing systems that are used to manufacture these stones

We also upgrade the services as well as these machineries on timely basis to provide best quality products to our customers. Our systems not only meet the international standards but have up to date technology which makes our products efficient and safe as they strictly adhere to the international health, safety and environmental rules.

Moreover, we have a system in place which ensures prompt delivery of products. We have an efficient supply chain management process which makes our products cost effective as well as provide prompt and safe delivery to our customers in the market. We wish to maintain our brand which is known in the market for providing cost effective and quality products.

ABOUT US (EDITED)

Our pioneer firm, India's Granite is a Bengaluru based firm which supplies natural stones in domestic as well International markets. Before it started, there was a huge demand of Natural Stones in the world which was increasing day by day and with the aim to fulfil this demand, we came into existence with an aim to provide best quality of stones and a huge variety to choose from.

India is one of the biggest natural stone producers and a home to many types of natural stones such as Granite's, Sandstone's, Slates, Basalt and Lime stones. These stones are used for all types of flooring, wall cladding, outdoor paving's in gardens and other applications.

We have established our supply chain in India's rich granite belt. This strategy has proven to be very effective as it provides us an uninterrupted supply of raw materials. The benefits are obvious – Production is more cost effective than competition, a strategic advantage which is further reciprocated as a cost advantage for customers as they could procure the stones at better rates; Another benefit is our ability to fulfil orders within required timeframe because of the easy availability of raw material.

Our principle suppliers are known for winning many government bids in Tamil Nadu and Karnataka because of the lower costs, the region has wide array of stocks available in 300 different colours. These affiliates have been collaborating with Foreign Quarry owners from Norway, Spain, Italy and Brazil to procure blocks for barter substructures.

These structures once procured arrive at our factory from where they are processed and exported to multiple countries at competitive prices. This price advantage can be credited to the low cost of labour in India and an ever increasing demand of these stones. A similar strategy has been followed by these quarry owners while they procure from us with a cost advantage to further process in their countries.

The blocks are processed into Polished Slabs. At times they are given other finishing's such as Flamed, Honed, Leather, Bush hammered and Laparto to re-exported worldwide.

There exists several inspection agencies that can be hired by clients but we provide an advantage with hiring these agencies themselves to satisfy the International clients who do not need to take this plunge. The service is provided at all the levels of supply. We also export a wide variety of other products ranging from Natural Split Finish Basalt, Slate, Sandstones and lime stones.

We care for our customers and that is why we take care of the quality of our products right from the beginning – procurement, cutting of materials into slabs, polishing, packing or stacking, stuffing in containers – every stage is tested for quality. The materials are processed by the modern machines of International standards with technologically advanced systems. Moreover, these machineries are upgraded from time to time in order ensure that we always give the best quality to our customers. Our products are safe and our processes are efficient. All our products are produced as per international health, safety and environmental rules.

We have a system in place which provides prompt and safe deliveries to our customers with an efficient supply chain which also makes these products cost effective for them. Our strength is cost effectiveness with availability of quality products and we strive every day to maintain our core.
